- Total Records: ~2.4 Million (Raw Data)
- Valid Applications: ~596K (After Data Cleaning & Removing Duplicates)
- Key Features:
- -Case Status (Certified, Denied, Withdrawn)
- -Employer Name
- -Job Title
- -Salary
- -Work Location (State)
- -Application Date

TOOL USED

- • SQL → Data analysis
- • Power BI → Dashboard

KEY PERFORMANCE INDICATORS

- Total Valid Applications analyzed:596K+
- Number of Employers involved:72K+
- Average Salary offered: $389K
- Unique Job Roles identified: 120K+
- Overall Approval Rate: 92.5%

KEY INSIGHTS

- High Approval Rate (~92.5%) indicates **strong demand for skilled foreign workers.**
- Significant data reduction (2.4M → 596K) highlights the **importance of data cleaning and removing duplicates.**
- **Technology roles (e.g., Software Engineers) dominate H1B applications.**
- Top employers such as **Amazon, Google, and Microsoft** lead in visa sponsorship.
- **California, Texas, and New York** emerge as major hiring hubs.
- Salary distribution shows **higher pay in specialized and managerial roles.**

DASHBOARD OVERVIEW

- KPI Cards display key metrics like applications, salary, and approval rate
- Pie Chart shows distribution of application status – **Certified, Denied, Withdrawn**
- Line Chart highlights application trends across quarters
- Bar Charts represent top employers and job roles
- Map Visualization shows state-wise distribution of applications
- Filters (Case Status, Quarter) enable dynamic analysis
